This document consists of 23 printed pages and 1 blank page.
In triangle $ABC$, $AB = 10$ m, $BC = 6.5$ m and $\hat{BAC} = 90^\circ$.

(a) Find $A\hat{C}B$. 

Answer .................................. [2]
(b) 

$D$ is the point on $BA$ produced such that $CD = 16.4$ m.

(i) Find $AD$.  
Give your answer in metres and centimetres, correct to the nearest centimetre.

Answer $\ldots \ldots \ldots \text{m} \ldots \ldots \ldots \text{cm}$ [3]

(ii) Find $D\hat{C}B$.

Answer $\ldots \ldots \ldots \ldots \ldots \text{[2]}$
2 (a) Factorise $4x^2 - 1$.

(b) $P = \frac{2Q + R}{R}$

(i) Find $P$ when $R = Q$.

(ii) Rearrange the formula to make $R$ the subject.

(c) Solve the simultaneous equations.

\[ \begin{align*}
3x + 4y &= 17 \\
2x - 5y &= 19
\end{align*} \]

[3 marks]
(d) A shopkeeper sells cartons of milk and bottles of water. Each carton of milk costs $2.40, and each bottle of water costs $0.80. One day he sells $x$ cartons of milk. On the same day, he sells 20 more bottles of water than cartons of milk.

(i) Write down an expression, in terms of $x$, for the number of dollars he receives from the sale of these cartons and bottles. Simplify your answer.

Answer .................................. [2]

(ii) The total amount he receives that day from the sale of these cartons and bottles is greater than $250.

Form an inequality in $x$ and solve it.

Answer .................................. [2]

(iii) Hence write down the least number of cartons of milk that he sells that day.

Answer .................................. [1]
3 (a) In 2009 the cost of posting a letter was 36 cents.

(i) A company posted 3000 letters and was given a discount of 4%.

Calculate the total discount given.
Give your answer in dollars.

Answer $ ..................................... [1]

(ii) In 2010, the cost of posting a letter was increased from 36 cents to 45 cents.

Calculate the percentage increase.

Answer .................................% [2]

(iii) After the price increase to 45 cents, the cost to the company of posting 3000 letters was $1302.75.

Calculate the new percentage discount given.

Answer .................................% [2]
(b) In 2010, it cost $5.40 to post a parcel. This was an increase of $12\frac{1}{2}\%$ on the cost of posting the parcel in 2009. Calculate the increase in the cost of posting this type of parcel in 2010 compared to 2009.

Answer $\$ \text{..........................} \quad [3] \$
4 (a) 

AB and CD are parallel.
EGHF is a straight line.
HČF = 46° and HFC = 32°.

(i) Find C\(\hat{H}\)F.

Answer ..................................... [1]

(ii) Find G\(\hat{H}\)D.

Answer ..................................... [1]

(iii) Find H\(\hat{G}\)B.

Answer ..................................... [1]
(b)  $A, B, D$ and $E$ are points on a circle.

$AD$ and $BE$ intersect at $C$.

(i)  Show that triangles $ABC$ and $EDC$ are similar. Give your reasons.

Answer ...........................................................................................................................................
........................................................................................................................................................
........................................................................................................................................................
........................................................................................................................................................
......................................................................................................................................................... [2]

(ii)  Given that $AC = 5$ cm, $BC = 5.5$ cm and $CE = 2$ cm, find the length of the chord $AD$.

Answer ............................... cm [2]
$AD$ and $BC$ are arcs of circles with centre $O$.
$A$ is a point on $OB$, and $D$ is a point on $OC$.
$OA = 20\text{ cm}$ and $AB = 25\text{ cm}$.
$A\hat{O}D = 150^\circ$.

(a) Calculate the perimeter of the shaded shape $ABCD$. 

Answer .......................... $\text{cm}$ [3]
(b) Calculate the area of the shaded shape $ABCD$.

Answer .......................... cm$^2$ [3]

(c) The shape $ABCD$ is used to make a lampshade by joining $AB$ and $DC$.

Calculate the radius, $r$ cm, of the circular top of the lampshade.

Answer .......................... cm [2]
6 The heights of 150 children are measured. The results are summarised in the table.

<table>
<thead>
<tr>
<th>Height (h cm)</th>
<th>130 &lt; h ≤ 140</th>
<th>140 &lt; h ≤ 150</th>
<th>150 &lt; h ≤ 155</th>
<th>155 &lt; h ≤ 160</th>
<th>160 &lt; h ≤ 170</th>
<th>170 &lt; h ≤ 190</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frequency</td>
<td>10</td>
<td>30</td>
<td>20</td>
<td>30</td>
<td>35</td>
<td>25</td>
</tr>
</tbody>
</table>

(a) Calculate an estimate of the mean height.

\[ \text{Answer} \quad \underline{\text{............................... cm}} \quad [3] \]

(b) (i) One child is chosen at random.

Find the probability that this child has a height greater than 160 cm.

\[ \text{Answer} \quad \underline{\text{...............................}} \quad [1] \]

(ii) Two children are chosen at random without replacement.

Find the probability that the height of one child is greater than 160 cm and the height of the other is 150 cm or less.

\[ \text{Answer} \quad \underline{\text{...............................}} \quad [2] \]
(e) Complete the histogram to represent the information in the table.
Section B [48 marks]

Answer four questions in this section.

Each question in this section carries 12 marks.

7 A cylindrical, open container has a diameter of 21 cm and height of 8 cm.

(a) (i) Calculate the total external surface area of this container.

Answer ................................ cm\(^2\) [3]

(ii) A manufacturer receives an order for 30,000 containers. He needs an extra 150 cm\(^2\) of material for each container to cover wastage. Calculate the area of material needed to make these containers. Give your answer in square metres.

Answer ................................ m\(^2\) [2]
[The Surface area of a sphere is $4\pi r^2$] [The Volume of a sphere is $\frac{4}{3}\pi r^3$]

(b) A circular top that can hold 4 hemispherical bowls can be placed on the container.

The top is a circle of diameter 21 cm with four circular holes of diameter 7 cm.
A hemispherical bowl of diameter 7 cm fits into each hole.
The cross-section shows two of these bowls.

(i) Calculate the inside curved surface area of one of these hemispherical bowls.

Answer ............................. cm$^2$ [1]

(ii) Calculate the total surface area of the top of the container, including the inside curved surface area of each bowl.

Answer ............................. cm$^2$ [3]

(iii) With the top and the 4 bowls in place, calculate the volume of water required to fill the container.

Answer ............................. cm$^3$ [3]
8 The variables \( x \) and \( y \) are connected by the equation

\[
y = 1 + 2x^2 - x^3.
\]

The table below shows some values of \( x \), and the corresponding values of \( y \), correct to 1 decimal place where appropriate.

<table>
<thead>
<tr>
<th>( x )</th>
<th>-1</th>
<th>-0.5</th>
<th>0</th>
<th>0.5</th>
<th>1</th>
<th>1.5</th>
<th>2</th>
<th>2.5</th>
</tr>
</thead>
<tbody>
<tr>
<td>( y )</td>
<td>4</td>
<td>1.6</td>
<td>1</td>
<td>1.4</td>
<td>2</td>
<td>2.1</td>
<td>1</td>
<td>( p )</td>
</tr>
</tbody>
</table>

(a) Calculate \( p \).
Give your answer correct to 1 decimal place.

Answer \( p = \) ..................................... \[1\]

(b) On the graph paper opposite, using a scale of 2 cm to represent 1 unit on both axes, draw a horizontal \( x \)-axis for \(-2 \leq x \leq 3\), and draw a vertical \( y \)-axis for \(-3 \leq y \leq 5\).
On your axes, plot the points given in the table and join them with a smooth curve. \[3\]

(c) Use your graph to find all the solutions of \( 1 + 2x^2 - x^3 = 2 \).

Answer \( x = \) ................................................................. \[2\]

(d) By drawing a tangent, find the gradient of the curve at the point where \( x = -0.5 \).

Answer ........................................ \[2\]

(e) By drawing an appropriate straight line on the grid, solve the equation \( 1 + 2x^2 - x^3 = x \).

Answer \( x = \) .................................................. \[2\]

(f) Find the range of values of \( k \) such that \( 1 + 2x^2 - x^3 = k \) has 3 solutions.

Answer ........................................ \[2\]
A, B, C and D are four points on level ground. 
BDC is a straight line. 
AD = 30 m and DC = 64 m. 
ABD = 37° and ADB = 58°.

(a) Calculate AB.

Answer ................................ m [3]

(b) Calculate AC.

Answer ................................ m [4]
(c) Calculate the area of triangle $ADC$.

\[ \text{Answer} \quad \ldots \ldots \ldots \ldots \ m^2 \ [2] \]

(d) A vertical tower stands at $A$. $P$ is the point on the line $BC$ such that the angle of depression from the top of the tower to the line $BC$ is greatest.

Given that this angle of depression is $34^\circ$, calculate the height of the tower.

\[ \text{Answer} \quad \ldots \ldots \ldots \ldots \ m \ [3] \]
ABCD is a square. 
AP = BQ = CR = DS.

(a) Giving reasons, show that triangles PAS and QBP are congruent.

Answer ......................................................................................................................................
...................................................................................................................................................
...................................................................................................................................................
.............................................................................................................................................. [3]

(b) The length of a side of the square ABCD is 40 cm and AP = x cm.

(i) Write down an expression for PB in terms of x.

Answer ........................................... cm [1]

(ii) Show that the area, y cm², of PQRS is given by \( y = 1600 - 80x + 2x^2 \).
(c) (i) When \( y = 1100 \), show that \( x^2 - 40x + 250 = 0 \).

(ii) Solve the equation \( x^2 - 40x + 250 = 0 \). Give each answer correct to 1 decimal place.

\[
\text{Answer} \quad x = \ldots \ldots \ldots \text{or} \ldots \ldots \ldots \quad [3]
\]

(d) Two outlines of \( ABCD \) are drawn to scale in the answer space below. The scale is \( 1 : 10 \).

Draw accurately the quadrilateral \( PQRS \) corresponding to each value of \( x \) found above.

\[
\text{Answer}
\]
11 (a) 

B is the midpoint of OD and E is the midpoint of OA. 
C is the point on AB such that AC : CB = 2 : 1. 
\( \overrightarrow{OA} = p \) and \( \overrightarrow{OB} = q \). 

(i) Find, in terms of \( p \) and \( q \), 

(a) \( \overrightarrow{AB} \), 

Answer .................................... [1] 

(b) \( \overrightarrow{CD} \), 

Answer .................................... [1] 

(c) \( \overrightarrow{ED} \), 

Answer .................................... [1] 

(ii) Use your answers to parts (i)(b) and (i)(c) to make two statements about the points E, C and D. 

Answer ........................................................................................................................................... [2]
The diagram shows triangle $A$ and line $L$.

(i) Triangle $A$ is mapped onto triangle $B$ by a reflection in line $L$.

Draw and label triangle $B$.  

(ii) Triangle $A$ is mapped onto triangle $C$ by an anticlockwise rotation of $90^\circ$, centre $(0, 3)$.

Draw and label triangle $C$.  

(iii) Triangle $C$ is mapped onto triangle $D$ by a reflection in line $L$.

Describe the single transformation that maps triangle $B$ onto triangle $D$.

Answer ... ..................................................................................................................................................  

.................................................................................................................................................. [3]
