**BUSINESS**

**9609/12**

Paper 1 Short Answer and Essay

**March 2019**

MARK SCHEME

Maximum Mark: 40

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the March 2019 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **14** printed pages.

**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**General Marking Guidance: 9609 Paper 1**

Marks are awarded for each answer when the following Assessment Objectives (AO) are met. The mark scheme for each answer indicates when and how each AO can be met.

**AO1 – Demonstrate knowledge and understanding of business concepts.**

The focus in Section A of the Examination Paper is on this first AO.

- (a) Questions 1, 2, and 4 will meet this AO using definitions and explanations of business concepts.
- (b) Question 3 provides an opportunity for the application and a more developed explanation of a business concept. The 4–5-mark level specifically provides for this more developed explanation.

In Section B of the Examination Paper

- (a) Questions 5, 6, and 7 still require supporting **Knowledge and Understanding (AO1)**, but there is now a focus on **Application (AO2)**, **Analysis (AO3)**, and **Evaluation (AO4)**. These skills are set out below:

**AO2 – Apply knowledge and understanding of business concepts to general and specific situations and contexts.**

- (a) Where a specific business or context is named in the question then the candidate is required to relate answers specifically to this business or context.
- (b) It is not sufficient to merely repeat the name of the business or the context.

**AO3 – Analyse business problems, issues, situations and contexts, through a discussion and interpretation of evidence, debate, theory, impact and consequence, to produce reasoned and coherent arguments.**

- (a) Level 3 answers will likely use terms such as – because, leads to, therefore, so that, as a result, consequently – thereby showing analytical development for AO3.

**AO4 – Limited Evaluation is given**

- (a) When an attempt is made, (probably in a concluding section of an answer), to address and comment on the value and validity of the previous analysis.
- (b) These comments may be quite brief and be more opinionated than reasoned.
- (c) A mere concluding summary of preceding analysis is, however, not evaluation.

**AO4 – Evaluation occurs**

- (a) When an answer comments on the validity/significance of previous analysis in an evidence based and reasoned way.
- (b) This often leads to the presentation of appropriate substantiated judgements, decisions, or recommendations.

Question	Answer	Marks
1(a)	<p><b>Define the term ‘Just in Time’ (JIT).</b></p> <p>A method of managing inventory / a method of production / a production or manufacturing process (1).  Ordering supplies / materials / inventory only when required / according to the level of production / only when a customer order has been placed (1).  Purchasing only the amount of inventory that is forecast to be sold (1).  Aims to avoid holding inventory / reduces the amount of stock held at any one time (1).</p> <p>Sound definition – 2 of the factors listed above (2 marks)</p> <p>Partial definition – 1 of the factors listed above (1 mark)</p> <p>No creditable content. (0 marks)</p>	<b>2</b>
1(b)	<p><b>Briefly explain <u>two</u> benefits for a manufacturing business of using Just in Time (JIT).</b></p> <p><i>Answers could include:</i></p> <ul style="list-style-type: none"> <li>• Stock levels of raw materials, components, work in progress and finished goods can be kept to a minimum</li> <li>• Less stock holding reduces storage space and saves rent/insurance costs</li> <li>• Less working capital tied up in stock as stock is only bought when needed</li> <li>• Less likelihood of stock perishing, becoming obsolete or out of date</li> <li>• Better able to keep up with changing trends and customer demand than with more long-term production methods</li> <li>• Avoids build-up of unsold finished product if demand suddenly changes</li> <li>• Less time is spent on checking and re-working the product of others as the emphasis is on getting the work right first time</li> </ul> <p>Sound explanation of <b>two</b> benefits for a manufacturing business of using Just in Time (JIT). (3 marks)</p> <p>Sound explanation of <b>one</b> or partial explanation of <b>two</b> benefits for a manufacturing business of using Just in Time (JIT). (2 marks)</p> <p>Partial explanation of <b>one</b> way or a list of <b>two</b> benefits for a manufacturing business of using Just in Time (JIT). (1 mark)</p> <p>No creditable content. (0 marks)</p>	<b>3</b>

Question	Answer	Marks
2(a)	<p><b>Define the term ‘demand’.</b></p> <p>The amount of a product that consumers are prepared to buy / willingness / ability of consumers to buy / purchase a good (1)  How much willing to pay for it / at a given price (1).  With all other factors remaining constant (1).  The want or need of consumers for goods and services that businesses need to satisfy / fulfil (1).  Effective demand is the ability to pay for the products demanded (1).</p> <p>Sound definition – 2 of the factors listed above (2 marks)</p> <p>Partial definition – 1 of the factors listed above (1 mark)</p> <p>No creditable content. (0 marks)</p>	<b>2</b>
2(b)	<p><b>Briefly explain <u>two</u> factors which might influence demand for digital cameras.</b></p> <p><i>Answers could include:</i></p> <ul style="list-style-type: none"> <li>• The price of the cameras increases/decreases so demand falls/rises</li> <li>• A competitor's prices fall/rise so demand for one firm decreases/increases</li> <li>• Time of the year/seasons prompts buying a camera to take holiday photos</li> <li>• Technology advances causing people to upgrade</li> <li>• Marketing campaigns by manufacturers or retailers</li> <li>• Use of mobile phone rather than digital camera reduces demand</li> </ul> <p>Sound explanation of <b>two</b> factors which might influence demand for digital cameras. (3 marks)</p> <p>Sound explanation of <b>one</b> or partial explanation of <b>two</b> factors which might influence demand for digital cameras. (2 marks)</p> <p>Partial explanation of <b>one</b> way or a list of <b>two</b> factors which might influence demand for digital cameras. (1 mark)</p> <p>No creditable content. (0 marks)</p>	<b>3</b>

Question	Answer	Marks
3	<p><b>Explain why there might be conflict between <u>two</u> stakeholder groups of a large mining company.</b></p> <p><i>Answers could include:</i></p> <p><b>Stakeholders</b> are groups / individuals that are affected by and/or have an interest in the operations and objectives of the business. E.g. directors, managers, employees, shareholders, customers, suppliers, competitors, government, local community, pressure groups, media.</p> <p>Different stakeholder <b>objectives</b> – profit, wages, cost reduction, job security, safety, share price, payment, product availability, product quality, product price, environmental impact, local impact, legal issues, tax receipts, job creation, CSR.</p> <p><b>Mining company</b> – large employer, provides fuel (need), building material, gems, minerals etc. All bought by other businesses and used in consumer products. User of heavy plant and other resources from suppliers. Possibly large / inter-national company with high level of investment in the area. Large profits to tax.</p> <p>Environmental impact likely to be high. Health and safety an issue. Alternative fuels. Possibly labour intensive (low paid). Possibly high number of shareholders wanting dividends. Products may not be sold in the country of origin.</p> <p><u>Conflict likely where</u></p> <ul style="list-style-type: none"> <li>• Wage rises might be at the expense of lower profits and dividends</li> <li>• Managers want organisational growth at the expense of short-term profits</li> <li>• Expansion of production might cause extra noise and disruption in local community</li> <li>• Long term environmental damage not considered</li> <li>• Poor working conditions and low pay vs high profits</li> </ul> <p>Effective explanation of why there might be conflict between different stakeholder groups of a large mining company. (4–5 marks)</p> <p>Explanation of why there might be conflict between different stakeholder groups. (2–3 marks)</p> <p>Understanding of stakeholders. (1 mark)</p> <p>No creditable content (0 marks)</p>	5

Question	Answer	Marks
4(a)	<p><b>Define the term ‘statement of financial position’.</b></p> <p>A record of the assets / everything a business owns (1).  A record of the liabilities / everything a business owes (1).  A reflection of the worth of the company (1).  Shows the total capital / capital employed in a business (1)</p> <p>Sound definition – 2 of the factors listed above (2 marks)  Partial definition – 1 of the factors listed above (1 mark)  No creditable content. (0 marks)</p>	<b>2</b>
4(b)	<p><b>Briefly explain <u>two</u> uses an investor might make of a statement of financial position.</b></p> <p><i>Answers could include:</i></p> <ul style="list-style-type: none"> <li>• Decide whether to invest in a business</li> <li>• To see the amount of assets a business has</li> <li>• To determine the (financial) health / performance of a business</li> <li>• To compare with the previous year / to compare with competitors to show whether the business is worth more or less / growing</li> <li>• Assess the liquidity of the business using working capital and current ratio</li> <li>• To see the amount of debt the business has</li> <li>• Help decide how to vote at shareholder meetings e.g. whether to expand</li> </ul> <p>Sound explanation of <b>two</b> uses an investor might make of a statement of financial position. (3 marks)  Sound explanation of <b>one</b> or partial explanation of <b>two</b> uses an investor might make of a statement of financial position. (2 marks)  Partial explanation of <b>one</b> way or a list of <b>two</b> uses an investor might make of a statement of financial position. (1 mark)  No creditable content. (0 marks)</p>	<b>3</b>

Question	Answer	Marks																		
5(a)	<p><b>Analyse the likely benefits to a car manufacturing company of using capital intensive processes.</b></p> <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>4</td><td>Good analysis of the benefits to a car manufacturing company of using capital intensive processes.</td><td>7–8</td></tr> <tr> <td>3</td><td>Some analysis of the benefits to a car manufacturing company of using capital intensive processes.</td><td>5–6</td></tr> <tr> <td>2</td><td>Some explanation / application of the benefits of using capital intensive processes.</td><td>3–4</td></tr> <tr> <td>1</td><td>Limited understanding or description of capital intensive processes.</td><td>1–2</td></tr> <tr> <td>0</td><td>No creditable content</td><td>0</td></tr> </tbody> </table> <p><i>Answers could include:</i></p> <p>Capital intensive processes rely mainly on capital ie plant and machinery, IT systems, etc rather than labour. Many car plants use robots for heavy lifting and paint spraying. Initial cost is high but can save on labour costs in the long term.</p> <p><b>Benefits of using capital intensive processes include:</b></p> <ul style="list-style-type: none"> <li>• Production can continue 24/7 so output is high, good for flow production</li> <li>• Quality of work is consistent so good for standardised products</li> <li>• Work is accurate and precise so less customer dissatisfaction and waste</li> <li>• Good for tasks which are dangerous and unpleasant for people</li> <li>• More output per hour than labour so unit costs fall</li> <li>• Machines don't need breaks or holidays or get ill and no HR issues</li> </ul> <p>Accept some discussion of the disadvantages of using capital intensive processes.</p>	Level	Description	Marks	4	Good analysis of the benefits to a car manufacturing company of using capital intensive processes.	7–8	3	Some analysis of the benefits to a car manufacturing company of using capital intensive processes.	5–6	2	Some explanation / application of the benefits of using capital intensive processes.	3–4	1	Limited understanding or description of capital intensive processes.	1–2	0	No creditable content	0	8

Question	Answer	Marks
6	<ul style="list-style-type: none"><li>Effectiveness of any manager depends on a complex set of skills and styles being used appropriately in a wide range of different tasks which may be routine or non-routine and may depend on the different roles and responsibilities of the manager and their position in the hierarchy.</li></ul>	

Question	Answer	Marks																		
7(a)	<p><b>Analyse the benefits for a new business of producing a cash flow forecast.</b></p> <table border="1"> <thead> <tr> <th>Level</th><th>Description</th><th>Marks</th></tr> </thead> <tbody> <tr> <td>4</td><td>Good analysis of the benefits for a small new business of producing a cash flow forecast.</td><td>7–8</td></tr> <tr> <td>3</td><td>Some analysis of the benefits of producing a cash flow forecast.</td><td>5–6</td></tr> <tr> <td>2</td><td>Some explanation / application of the benefits of producing a cash flow forecast.</td><td>3–4</td></tr> <tr> <td>1</td><td>Limited understanding of a cash flow forecast.</td><td>1–2</td></tr> <tr> <td>0</td><td>No creditable content</td><td>0</td></tr> </tbody> </table> <p><i>Answers could include:</i></p> <p>A Cash Flow Forecast is an estimate of the amount of money you expect to flow in and out of your business and includes all your projected income and expenses.</p> <p>Benefits include:</p> <ul style="list-style-type: none"> <li>• <b>Identify potential shortfalls in cash balances in advance</b> – an ‘early warning system’. For example, if the forecast shows a negative cash balance then the business needs to ensure it has a sufficient bank overdraft facility.</li> <li>• See whether the trading performance of the business (revenues, costs and profits) turns into cash. Helps prevent early business failure.</li> <li>• <b>Makes sure that the business can afford to pay suppliers and employees.</b> Suppliers who don't get paid will soon stop supplying the business; disputes will arise if employees are not paid on time.</li> <li>• <b>Spot problems with customer payments</b> – preparing the forecast encourages the business to look at how quickly customers are paying their debts. However, this is not really a problem for businesses (like retailers) that take most of their sales in cash/credit cards at the point of sale.</li> <li>• <b>As an important part of financial planning</b> – the cash flow forecast forces the owner to think about likely revenues and costs in advance.</li> <li>• <b>External stakeholders such as banks may require a cash flow forecast.</b> Certainly, if the business wants a bank loan, the bank will want to see the CFF as part of the business plan.</li> <li>• <b>Analyse whether the business is achieving the financial objectives</b> set out in the business plan.</li> <li>• <b>Used as a tool to answer ‘what if’ questions about changes in income and expenses.</b> Will therefore allow the new business to think about the appropriateness of pricing, marketing and suppliers.</li> </ul>	Level	Description	Marks	4	Good analysis of the benefits for a small new business of producing a cash flow forecast.	7–8	3	Some analysis of the benefits of producing a cash flow forecast.	5–6	2	Some explanation / application of the benefits of producing a cash flow forecast.	3–4	1	Limited understanding of a cash flow forecast.	1–2	0	No creditable content	0	8
